(54) Title: REMOTE CONTROL METHOD OF HOME NETWORK AND SYSTEM THEREOF

(57) Abstract: A remote control method of a home network and system thereof are disclosed to remotely control devices connected to a home network system. A control point of a home network is set at a home agent in the home network system and at a remote terminal respectively, and then the control point set at the home agent and the control point set at the remote terminal are connected through a specific channel, thereby controlling the device(s) connected to the home network system.
